The "carbon cradle" is a unique basket made of carbon fiber. It is also an encounter of high-technology and craftsmanship. The design is that of a traditional basket cradle made of most modern materials.

The "Tangram Sofa" is composed of seven parts whose geometric origin is a square, with the four base modules and the three back modules linked by wooden

U-shaped components under the sofa. It is a modular sofa system that can be arranged in the most diverse ways.

The watch "Champs Elysees" is made of white gold and Chinese lacquer. It has a mirror polished steel dial, set with 36 diamonds, coupled with one way mirror allowing a plunging reflection that gives an illusion of a well of diamonds.

» Design is to imagine within space and time. «

Luc Swen is a freelance design label created by Julien Bernard in 2008. The label specializes luxury product design and 3D rendering pictures. Luc Swen also produces some limited editions in collaboration with the best local artisans while maintaining a certain exclusivity.
